

PIGS DO CRY

On May 8 2009, activist Emma Haswell exposed on the ABC's Stateline the appalling conditions on a pig farm in Winnaleah in the State's North. She found pigs confined in undersized stalls, crippled with abscesses and sores and infested with maggots.

THIS FARMER, NOW FACING PROSECUTION, CONTINUES TO BE A SUPPLIER TO WOOLWORTHS.

Keeping pigs, who are highly intelligent, sensitive and clean animals in such **WRETCHED MISERY** is ALLOWED by law, because Governments sanction what would normally be cruelty offences by means of Codes of Practice (called "Standards" in Tasmania)

What you can do:

You as a consumer have enormous power over this industry. Refuse to buy pork products from intensive farming operations. Refuse to shop at Woolworths and tell them why.

This was found at a pig farm in Northern Tasmania
 200-300 sows ALL in small and marginally larger stalls except those being impregnated, for ALL their time
 None could move more than one step forward or back
 Smaller stalls had no laid-on water, sows were suffering badly from thirst
 Food left just outside their stalls where they could see and smell it but not reach it
 A boar in a sow stall

Write to Woolworths, Coles and other retailers and tell them you will not buy intensively farmed pork products

Write to: Primary Industries Minister David Llewellyn (Level 1, Franklin Square, Hobart 7000, David.Llewellyn@parliament.tas.gov.au) demanding an end to this shocking cruelty. Sow stalls are banned in the UK and some US states and being phased out in the EU.

Use your buying power and don't buy products from intensive farming operations.
